iPhone and Android App - Brand New App Available

At Direct2florist we thrive on providing excellent service for customers and florists. Research tells us time and again customers LOVE being kept up to date with the status of their order. Hence we have developed the D2F Delivery App.

More Information...

We strongly recommend that all our members use the D2f App as it will greatly increase your chance of receiving a 5 STAR review. We recommend all members take advantage of this free and easy to use technology.

Features...

- (1) Push Notifications to your Android/iPhone
- (2) Accept/Reject orders
- (3) Initiate payment
- (4) Take photo of the Flower.
- (5) Tag the order as delivered - the App emails the photo to your customer and invites a review.

D2F Notifier for PCs

The Direct2florist Notifier is an executable program you download and install.

Once downloaded it lives in the bottom right hand corner of your screen (amongst your tray icons.) It is only available for PCs (not available for MAC) The D2F notifier pops up, prints (optional) and beeps upon an incoming orders. It makes a very distinctive sound! The limitation is it should only be run on one target PC - ie the PC in the shop.
